1. Make Sure the Following Folders and files all exist.

```
/CIS422Project2BlackJack
    /Documentation
        Installation_Documentation.pdf
        Programmer_Documentation.pdf
        User_Documentation.pdf
        SRS.pdf
        SDS.pdf
        Project_Plan.pdf
    basic_strategy.py
    betting_system.py
    Blackjack Card Counting Chart.png
    card.py
    card_count.py
    const.py
    deck.py
    game.py
    hand.py
    menu.py
    minigame.py
    participant.py
    README.md
    StartGame MAC and LINUX.sh
    StartGame WINDOWS.bat
```

`visualization.py`

2. Install Python Version 3.8 *or* 3.9

If you are using Windows or Mac you can acquire python 3.8 through the following link:

`https://www.python.org/downloads/`

If you are using Linux, python 3.8 may already be installed, but if it is not use the following commands in your preferred bash terminal:

```
$ sudo apt-get update
$ sudo apt-get install python3.8
```

python3.9 can be installed similarly.

3. That's it!

This project has NO dependencies on any sort of non-standard python package! It only uses "os" and "typing", so this is a total plug and play program, have fun learning how to become a card shark!
